Resides in: Moscow

Ready to relocate, ready to business trip

Position

Frontend Engineer (React, React Native, Typescript, Next.js, WebGL, Web3)

5+ years Frontend Developer with extensive experience and passion for creating elegant solutions to complex problems. Responsible, result-oriented and open to new challenges

Work experience — 5 years and 2 months

April 2024 —
present
2 year 1 months

Sreda Capital (BI.ZONE)

Moscow

Senior Frontend Engineer

Projects:

Development and development of several high-load frontend applications in the domains of **enterprise security, interactive marketing, Web3/DeFi and e-commerce/ marketplace**:

- Internal CRM system for managing privileged user access (Sberbank ecosystem)
- Interactive WebGL game for user acquisition (tutu.ru)
- Web3 platform for working with crypto assets and DeFi instruments (Strata Markets), including a product interface and marketing landing page
<https://app.strata.markets>
<https://strata.markets>
- Online platform for buying and selling works of art
<https://kupitkartinu.ru>

Responsibilities:

- Development of scalable frontend architectures for complex SPA and real-time systems
- Implementation of high-load interfaces with a focus on performance, UX, and accessibility
- Development of interactive visual solutions (WebGL, animation, graphics)
- Construction and development of the UI layer: reusable components, design systems, interface consistency
- Integration with backend APIs, CMS (Headless), Web3 infrastructure, and third-party services
- Performance optimization (bundle size, rendering, network) and Developer Experience
- Participation in architectural decisions, code reviews, and development of the team's engineering practices
- Leading frontend development on individual projects, mentoring developers

Key Achievements:

1. *Enterprise* (Sberbank, access control system):

- Developed a **user session tracking system** with playback (**Video/Terminal Player**), increasing transparency and auditing of user actions.
- Implemented **WEB-RDP access (RDP/SSH)** via a browser, reducing dependence on native clients.
- Designed a flexible **role-based authorization model** based on Keycloak and Casbin, with dynamic rights management.
- Developed a **universal table** with advanced filtering, aggregation, and data export (.xlsx/.csv), speeding up analysts' work.
- Optimized builds ($\approx$ -40% of time) through migration to Vite + Yarn 4.
- Implemented a **user settings system** and **full localization** with i18n support.
- Implemented **real-time** data updates via **WebSocket/SSE**.
- Migrated the API layer to **RTK Query** with type-safe client generation.
- Improved code quality: test coverage. **Storybook** documentation, component standardization
- Initiated and developed an internal **UI library**, which accelerated development and unified design across various projects.

2. Interactive (WebGL game, tutu.ru):

- Designed the architecture and fully implemented the frontend of an interactive game using **WebGL (PixiJS)**
- Served as Lead Frontend Developer, defining technical solutions and backend interactions
- Developed high-performance rendering and **game logic**, taking into account the limitations of mobile devices
- Integrate the application into the mobile environment via **WebView**
- Ensured stable operation of the product in **production** (the game was integrated into the mobile app and used by users)

3. Web3 / DeFi (<https://app.strata.markets>):

- Developed a full-fledged **Web3** application for working with crypto assets
 - Integrated several **blockchain** APIs and protocols
 - Developed a fault-tolerant UI for working with asynchronous and volatile Web3 data
- Implemented:
- Crypto **wallet integration**
 - Interaction with **smart contracts**
 - Token **swap** mechanics
 - Display of transactions and analytics (**trading activity, volumes, history**)
 - Dynamic theme switching (light/dark)

Landing Page (<https://strata.markets>):

- Created a high-load animated landing page using **scroll-driven animations**, **Lottie**, and complex **fixed/parallax** effects
- Implemented integration with the Hashnode API (GraphQL, pagination, article page)
- Optimized animation and loading performance for various devices

4. Art Marketplace (<https://kupitkartinu.ru>):

- Developed a frontend for a platform for buying and selling art based on **Next.js**

- Implemented integration with a headless CMS (**WordPress + GraphQL**)
- Built a system for displaying large volumes of data (paintings, artists, auctions) with optimized loading and rendering
- Implemented user scenarios: authorization, catalog, product cards, auction participation
- Ensured **SEO optimization** and high page performance

Stack: TypeScript, React, Redux Toolkit, RTK Query, Web3, PixiJS (WebGL), Vite, Yarn 4, Ant Design, Styled Components / SCSS / SASS, Jest / Vitest, Storybook, Swagger, REST API, GraphQL, WebView, Lottie, Hashnode API, Keycloak, Casbin

PharmHUB

Moscow, pharmhub.ru/

Middle Frontend Engineer (React / React Native)

Projects:

- [PharmAssistant](https://assistant.matchflow.ru): e-learning platform with interactive training for pharmacy professionals
<https://assistant.matchflow.ru>
- [Matchflow Analytics](#): analytical dashboard and B2B service for pharmaceutical manufacturers and pharmacy chains

Responsibilities:

- Developed and maintained responsive web applications using React, TypeScript, and Redux, ensuring optimal performance and accessibility
- Reworked existing codebases to improve scalability, reliability, and developer experience
- Collaborated closely with product, analytics, and marketing teams to refine requirements, prioritize features, and deliver value quickly
- Participated in UX research and wireframing, contributing to user-centric design decisions
- Regularly met with pharmacy clients to gather feedback and iterate on features
- Followed agile methodologies, participated in sprint rituals, and drove implementation of development best practices

Key Achievements:

- **Led full UI/UX redesign and frontend refactoring** of the PharmAssistant platform, resulting in a modernized architecture and improved performance
- **Developed a mobile version of PharmAssistant and Dophaminka** apps using React Native, including deployment to Google Play and App Store
- **Created a dynamic multi-step user onboarding system**, including profile completion with document upload and form validation
- **Implemented interactive learning modules** with guided training steps, increasing user engagement and task completion rates
- **Built a receipt scanning feature and real-time reward mechanics** for pharmacy users, improving user retention in Dophaminka
- **Engineered a flexible pharmaceutical order management flow**: product bundle selection, pharmacy location choice, order authorship, and quantity modification
- **Developed a component library with full Storybook documentation**, accelerating UI development and ensuring design consistency
- **Introduced real-time data updates via WebSockets/SSE**, improving responsiveness of analytical dashboards
- **Integration of external APIs and libraries** to extend application functionality, user feedback tracking (MTS Link, Yandex Metrica, Sendsay)

Stack: JS, TS, React, React Native, Redux, GO, GSAP, Storybook, SCSS, Yandex Tracker, MTS Open Api

Turkey, thecrypto.help/

Web-developer

Project:

Internal CRM system for B2B sales with Google Sheets and AI integration

- Developed and launched responsive landing pages with smooth animations using **GSAP**, ensuring consistent experience across browsers and devices
- Developed a modular, scalable frontend architecture, reducing time-to-market for new features
- Designed and implemented frontend architecture with clear separation of concerns between UI and business logic
- Integrated third-party services, including **Google OAuth2** for authentication and **Google Sheets** for live backend data sync
- Participated in UI/UX design, focusing on usability, performance, and business value
- Refactored and optimized legacy code, reducing load times and improving maintainability, reducing load times by ~30%
- Conducted code reviews and implemented clean code practices to improve team velocity

Education

Higher education
2024

Bauman Moscow State Technical University, Moscow
